

Risk Resilience: Mastering the Essentials of Risk Management

In collaboration with the Institute of Risk Management, our Risk Advisory Training Academy presents a series of eight risk management courses over a 2-year program aimed at assisting delegates in setting up and implementing a framework for success through to Board level risk reporting. The program starts with this two-day course on mastering the essentials of risk management.

Join us for a highly interactive and engaging in-person training session where we explore the need for risk management and revisit key concepts, principles, frameworks and tools that enab effective risk management implementation.

Key Benefits:

- Gain tools, analytical frameworks, leadership skills, and confidence to proactively manage risk and make a positive impact across your organization.
- Evaluate and manage risks both internal and external
- Take ownership of decision-making for a sustainable future
- Engage in real case studies and shared experiences
- Build your network

CPD points available upon attendance, contact us on +230 4673001 or <u>training@mu.gt.com</u> for a detailed course synopsis.

About the trainer – Laura Mallabone

With more than 20 years of experience, Laura is a registered with the Institute of Risk Management South Africa (IRMSA). She was involved in the development of the initial International Risk Management Standard (ISO 31000). She has been instrumental in the drive towards professionalization of Risk Management and has helped numerous vanisations set up their

Sustainability Essentials: Navigating ESG for Success

ESG (Environment, Social, and Governance) means many things to many different sectors, organisations, and sectors. It has historically been focused on environment and climate change, but it is not just about Carbon emissions and is shifting to be all-encompassing. Sustainable development was defined in the 80's to be "Development that meets the needs of the present without compromising the ability of future generations to meet their own needs." If we look back 40-plus years later, what have we been doing and what does this really mean for us?

Join us for a day where we introduce and unpack what ESG really is and make it practical and accessible using risk management to make sustainable decisions.

About the trainer – Laura Mallabone

With more than 20 years of experience, Laura is a registered with the Institute of Risk Management South Africa (IRMSA). Laura has recently been the Global Head of Sustainability Risk at Anglo American where she played a key role in driving the sustainability agenda. Similarly, as a consulting and trainer, she has guided many other organisations in defining their roadmap on ESG.
